

WB GROUP PRESENTATION

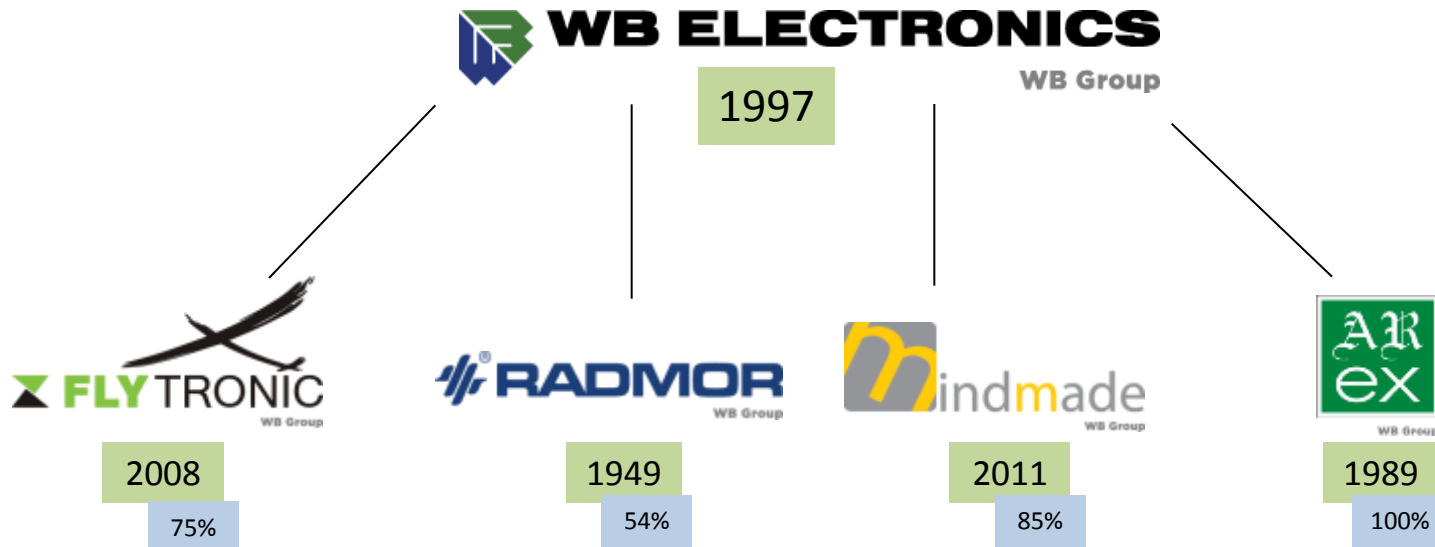

WB Group 

Structure of the WB Group

WB Group

EMPLOYMENT – 740 people (over 370 in R&D)

 ESTABLISHED
 SHARES OWNED BY WB ELECTRONICS SA

WB ELECTRONICS for years has consequently been conquering new areas of electronics and IT applications in the military systems. Our proprietary solutions allow to adopt new technologies and to develop innovatory products with unique utility properties.

The core systems and products:

1. C4ISR SYSTEMS - integrated command support systems and battlefield visualization systems,

2. SOFTWARE - integration of platforms and systems. Our experts are able to integrate WB Electronics software solutions with other platforms and systems already implemented by our customers,

3. MILITARY ELECTRONICS - gun and cannon automation, communication systems, sensors, computers and terminals,

4. INTEGRATION OF MILITARY ELECTRONIC SYSTEMS - in MBTs, APCs, specialized military vehicles, unmanned aerial and ground systems, manned and unmanned turrets, HQs, outposts with regard to existing subsystems.

RADMOR is the company with entirely Polish capital, whose share-holders are: WB Electronics and Bumar. Our company is a supplier of the radio communication equipment for the Polish Armed Forces and customers from several other countries. Company's military-oriented offer includes R3501 handhelds radios, V3501 vehicle sets, R35010 personal radios and F@stnet radios – manpack and vehicular.

RADMOR also offers different radio communication systems for non-military customers. RADMOR participates in various European research and development programmes (eg. ESSOR, CORASMA).

Company products range includes:

- tactical radios,
- radio communications systems: TETRA, DMR,
- professional radios .

Flytronic company, member of the WB Group, is a Research and Development Centre that conducts research in the field of surveillance and reconnaissance systems based on UAVs.

Company is involved in industrial research as well as development works in the scope of mechanics, electronics and information technology that are innovative on a global scale.

Flytronic is a dynamic and modern engineering company, with a great potential, oriented on experienced specialists with passion, creating unique self-developed conditions for employees and providing possibilities to realize innovative tasks, covering wide range of customer's demands.

MindMade is a Polish engineering company belonging to WB Group. MindMade is a leader in the field of advanced wireless solutions dedicated to professional voice communication. Company has also experience in crypto security.

With voice and cryptographic solutions we target special markets like government institutions and authorities including armed forces and security services.

Our wireless M2M products are dedicated to demanding industrial customers that need wireless wide-band access together with high quality SLA requirements.

Our activity includes designing and manufacturing electronics devices and systems.

The business of **AREX Sp. z o.o.** includes designing, testing and manufacturing components of automatic control systems, measuring equipment as well as control and diagnostic systems. The Company implements customized projects and those that require innovative solutions.

Experience gained in executing projects has provided the Company with professional and proven solutions.

The Company's offer includes the following control equipment and systems featuring components manufactured by the Company:

- training simulator systems,
- controllers of electrical servo drives,
- servo drives,
- control systems,
- manipulators, (joysticks, steering yokes etc.),
- control panels,
- optoelectronics sights.

Our solutions have been successfully integrated in many systems offered by other military equipment manufacturers.

THANK YOU FOR
YOUR ATTENTION
